

Rear Wing Adds Style To 700 Series Tonneau

Our Wing - Lighted or Unlighted - Adds An Eyecatching Note of Style!

The LEER Rear Wing, available for all 700 Series Tonneaus, adds a graceful but bold styling that suits the high-dimension design of the 700 perfectly.

The wing's sweeping curve across the tonneau is mounted on two subtle, air-cheating supports; a gentle upsweep across the trailing edge gives it just the right aerodynamics.

Resilient, durable fiberglass construction means the wing adds little weight - a big advantage. We add basecoat/clearcoat Dupont automotive paint under controlled conditions at our factory to help ensure that the wing has a high-gloss finish. An added benefit: The wing is covered by the LEER Limited Factory Warranty.

LEER designed the LEER Wing to fit perfectly with the style lines of the LEER 700 Series Tonneau, and it is available in both lighted and unlighted versions. When you order a factory-original rear wing from LEER you get the best: Great looks and premium quality.
